WP8 – Final pilot demonstration at Björkdal

ACCELIGENCE UAV contribution | October 2026

Final pilot demonstration completed: indoor and outdoor flights performed.

INDOOR DEMONSTRATION

SLAM in the mine

Indoor UAV flights performed at Björkdal.

SLAM demonstrated during the flights.

OUTDOOR DEMONSTRATION

Multispectral-equipped UAV

Outdoor UAV flights performed at Björkdal.

Multispectral camera carried as payload.

Previously completed activity: fragmented material characterisation.

Demonstrations completed; detailed results and lessons await the team debrief.

WP8 – Indoor SLAM and material characterisation

Completed activities; detailed outputs to be consolidated after the team debrief

FINAL BJÖRKDAL CAMPAIGN

Indoor SLAM flights

Indoor UAV flights executed.

SLAM workflow demonstrated underground.

SLAM result

Add confirmed mapping output after the debrief.

PREVIOUSLY CONDUCTED ACTIVITY

Fragmented material characterisation

Fragmented material characterised previously.

Detailed outputs await consolidation.

Characterisation result

Add the confirmed figure and main conclusion.

Indoor SLAM demonstrated; earlier characterisation activity completed.

WP8 – Outdoor multispectral demonstration

Final Björkdal pilot | Outdoor flights performed with the multispectral camera

Björkdal multispectral output

Representative imagery

Insert confirmed imagery and a short interpretation after the demonstration-team debrief.

Result figure pending team confirmation

Confirmed demonstration outcome

Outdoor UAV flights completed at Björkdal with the multispectral camera.

Results to add after the debrief

- Representative imagery and interpretation
- Image acquisition and quality findings
- Operational feedback and lessons learned

Flight demonstration completed; imagery and detailed findings pending feedback.
